MARCH, 1963

Spring Job Upturn Now in Progress Waits for the Copper Industry to Join the Employment Picture

1968 Starts With High Job Levels—Although the Montana copper strike carried over into 1968, employment in non-farm industries was at record levels for both January and February of this year. There were 181,000 wage earners on industrial payrolls for each of these two months this year. These were the highest winter non-farm job totals ever achieved in Montana. February non-farm employment this year was 2,500 above the February, 1967 total. This accomplishment, in the face of the lengthy copper strike, points up job growth in other Montana industries.

Job Totals Up In Six Major Industries—Six of the eight basic industry groups had more workers on their payrolls this February than the same month last year. Government employment, up 4,800, led the list with job gains of 4,600 at state and local units and 200 at the federal level. Construction was next with a gain of 1,500 workers for a February job total of 8,900. Moderate weather allowed work to continue on many outdoor projects and even permitted some new starts during the month. The fast growing trade industry chalked up a gain of 1,200 workers from February last year. The service industries showed good strength with a job gain of 500. Work-

ers hired to assist with income tax work were partially responsible for the 300 more workers on payrolls of finance, insurance, and real estate firms this February. Transportation, communications, and utility firms had 200 more workers this February than last.

Mining and Manufacturing Account For Only Declines—Reflecting the effects of the copper strike these two industries were short 6,000 workers from year ago job figures. The mining group showed the biggest decline with a 3,800 worker loss. The employment drop in manufacturing was 2,200. The table on page 3 of this publication shows employment for the various classifications in these two groups.

1967 Average Employment Highest On Record—When the copper strike began on July 15, 1967, non-farm employment in Montana had climbed to the record breaking total of 201,400. In fact, monthly non-farm job totals for ten of the twelve months of 1967 exceeded comparable months of all past years. Employment dropped during August and September, recovered in October, and the year ended with an average monthly non-farm employment total of 189,900. This exceeded the 1966 average employment by 3,200 workers, and in a year which carried the burden

of 5½ months of the copper strike it still set a record for average yearly employment in non-farm industries.

Back To Work Call Sounded—Workers started returning to jobs in a good array of industries early in March as winter released its grip on the state labor market. Barring unfavorable weather, substantial employment gains in most industry groups should be well underway by April. A good agenda of industrial and agricultural activity is now shaping up. Work is already in progress on some major building and highway projects. More new construction starts will appear as the season advances. Pouring of concrete at Libby Dam is expected early in June. The seasonal openings of national parks, resort areas, and the summer upturn in trade and service volume will create thousands of additional jobs. The excitement of new oil discoveries in southeastern Montana will translate into more jobs in both the oil fields and other industries. The logging industry, now showing the effects of the spring break-up period, should be at full steam by May 1st. There are now signs that the copper industry will soon be back in active labor market status after an absence of nearly 8½ months.

LABOR TURNOVER RATES IN MANUFACTURING AND MINING INDUSTRIES (per 100 employees)

(Compiled in cooperation with U.S. Bureau of Labor Statistics)

INDUSTRY	ACCESSION RATE						SEPARATION RATE

Along the Hiring Line— Field Summary for February

ANACONDA, Deer Lodge, Philipsburg—The community's economic condition worsens as the 8 month old copper strike presses hard on all industry groups. Trade and service volume at low levels with no new hiring; many workers on short work weeks. More idle workers leaving the area as spring season approaches. No hope for any economic upturn until strike is settled.

BILLINGS, Columbus, Hardin, Laurel, Red Lodge, Roundup—Good upswing in construction jobs with the prevalence of mild weather. New projects include addition to junior high school, warehouse, office building, and a feed mill. A \$½ million repair project at Yellowtail Dam employs 40 men. Highway construction crews increasing weekly. Trade and service industry jobs holding up well and on par with year ago. Production scheduled to start soon at new carpet factory at Crow Agency with initial work force of 20, but 200 potential jobs seen. Farm labor demand gradually edging upward.

BOZEMAN, Ennis, Three Forks, Trident—Employment holding up well in most industries but no big job upswing expected until spring work season begins in earnest. Construction wintered well; major projects in progress included interstate highway by-pass and \$400,000 shopping center. Lumber mill employment up with seasonal reopening of West Yellowstone stud mill. Logging slowed by spring break-up conditions.

BUTTE, Virginia City, Whitehall—The mining city economy continues its suffering as result of the copper strike. Local, state and national meetings of union and management officials show little effort toward settlement. Except for fair activity in construction, job trends in other groups practically nil. Half of trade workers on short work weeks.

CUT BANK—Employment trends in most industry groups were limited throughout February due to unsettled weather. Seasonal hiring upswing in construction, oil fields, trade, and agriculture should start developing in March.

DILLON—Construction job volume holds at good levels despite continuing carpenter strike which affects one major building project. Work soon to start on \$750,000 grade school. New tungsten

mill expected to be operating by April 1. Farm labor demand picking up with start of lambing and calving activities.

GLASGOW, Fort Peck, Malta, Opheim—Business activity shows some signs of slowdown due to anxiety of air base closure, set for July 1. Main street hiring mainly for replacements. Most construction held in suspension until weather permits full scale operations. Farm labor demand still slow.

GLENDIVE, Circle, Wibaux—Construction shaping up well for a busy season after fairly active work schedule throughout the winter months. Projects include interstate bridge, highway overpasses, community hospital, communications center, and addition to telephone company building. Oil field and service companies maintain steady trends. Main street business yet to recover from winter slowdown.

GREAT FALLS, Choteau, Fort Benton, Stanford—Area economy at good strength despite strike-idled smelter operations, now going into the 9th month. Construction adds more workers weekly as weather moderates. New job activity most prevalent in trade industries during February. Steady farm labor demand will show more activity as spring work season begins in earnest.

HAMILTON, Stevensville—Most industries now showing good spring job uptrends with exception of logging which is stalemated by spring break-up conditions—bad roads and imposed load limits. Good activity in trade and service firms after winter letdown. A slow market reduced potato sorting and shipping operations this year.

HAVRE, Chinook, Harlem—Employment in most industry groups stayed at steady levels throughout the winter.

Unemployment claims were below year ago levels. Spring job outlook appears good as more construction opens up, trade and service volume increases, and predicted increase in railroad employment. Farm labor demand increasing with some worker shortages expected in April.

HELENA, Boulder, Garrison, Townsend, White Sulphur Springs—Local economy has not yet shaken off the dullness of the past year. Some gradual improvement, however, now starting to show in construction and trade. Logging and mill operations in area had job increases. Demand for clerical workers on the rise. Fair farm labor demand with adequate supply of workers.

KALISPELL, Columbia Falls, Whitefish—Construction employment exceeded year ago totals by 60% as work continued on area building projects including Libby Dam. Trade and service industries at high volume benefitting from construction payrolls. Lumber mill employment keeps steady but spring break-up conditions cutting into logging jobs. Farm labor demand chiefly for grading and sorting 1967 potato crop.

LEWISTOWN, Harlowton, Ryegate, Winnett—Labor market developments show little change from year ago. Jobs increasing gradually in construction, trade, service, and agriculture as spring work season nears. Some upturn noted in manufacturing employment. Farm labor demand edging upward.

LIBBY—Labor market conditions were on uneven keel because of unsettled weather, some project completions and presence of several short lived labor disputes. Libby Dam work force near the 1,100 mark but no new hiring

* Preliminary Estimate

Along the Hiring Line— Field Summary for February

in evidence. Labor surplus exists in most occupations.

LIVINGSTON, Big Timber—Generally fair employment trends in most industries prior to spring hiring. Good demand for temporary trade and service workers due to special events. Recruitment of workers underway for Yellowstone Park. Logging, lumbering, and railroad activity on slow side.

MILES CITY, Baker, Ekalaka, Broadus, Jordan, Terry—Increased activity in oil fields mainly responsible for good job upswing in most industries. Industrial job placements at highest level of past 12 years. A prosperous year seen in both the industrial and agricultural sectors.

MISSOULA, Drummond, Arlee, Superior—Area economy shows stable trends in most industry groups. Lumber mills, construction, trade and service came through the winter months with generally better job levels than last year. Downturn in logging will last approximately six weeks or until logging roads firm up. Farm labor demand still not too active.

POLSON—Closure of plywood mill last November had little adverse effect on local economy. Most idled workers went into other lumber related jobs. Good trends evident in most industries including construction, trade, and lumbering.

SHELBY—Good February weather allowed construction, agriculture, and other outdoor work to keep good pace. Non-farm job placements show slight gain from last year. Farm job placements up appreciably from last year.

SIDNEY—Job placements at high levels as area economy continues on solid basis. Building, highway, and bridge construction set for spring hiring. New bank on construction agenda. Some farm labor shortages expected as spring work season begins.

THOMPSON FALLS, Hot Springs—Most industry groups keep stable job trends except logging presently hampered by spring break-up conditions. Lumber mills expected to operate on normal schedules with stock piled logs. Farm labor demand yet to develop for this season.

WOLF POINT, Plentywood, Scobey—Comparison with last year shows construction job gains offsetting some declines in oil field and agriculture. Good agenda of building construction in area. Job completions include two school additions and religious education center. Advance orders for farm help indicate demand may exceed supply by late March.

ESTIMATED EMPLOYMENT IN NON-AGRICULTURAL INDUSTRIES IN MONTANA (1)
